MESSAGE FROM

THE VICE-CHAIRMAN

MR. PRASIT DAMRONGCHIETANON

VICE-CHAIRMAN

**RICE BUSINESS TRANSPORTATION AND SERVICE
CHAROEN POKPHAND GROUP**

INNOVATIVE ORGANIZATION

Our vision is to become an organization that fosters innovation, creating economic, social and environmental benefits for the entire world. C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service are focus on creating a culture of exchanging knowledge along with encouraging employees to create innovations. To step towards sustainable business growth in terms of economy, society, and environment

“Innovation development isn’t just a matter of policy but should be conscious mind of every employee”

We encourage our employees to embody this way of thinking and to appreciate the importance of innovation in everything we do. Innovation is not just about scientific discoveries; it is an attitude that is integrated in every aspect of our business. Most importantly, innovation does not flourish in a vacuum, but is a product of collaboration and cooperation.

ENVIRONMENTAL

“It is our responsibility to strike the right balance between development and the conservation of our natural resources while respecting the rights of all of our stakeholders.”

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service are constantly seeking ways to share knowledge with and build the capabilities of the communities we impact while also ensuring we do all we can to help ecosystems and biodiversity flourish. This will help ensure that the natural resources, on which our business depends, remain sustainable and abundant.

From rice field to factory...

Tra Chat Story

We began to participate from the time farmers planted rice. We pass on knowledge about growing rice to farmers. Ready to support production factors. We buy rice at a 'higher price' than the market.

Nakhon Luang Factory

When the harvest is finished, the rice will be sent to “Nakhon Luang Rice Factory”, a large factory of Chattra rice Located on an area of over 270 rai in Nakhon Luang District, Phra Nakhon Si Ayutthaya Province. It is the largest and most modern rice factory in the world with a budget of 3,000 million baht.

With modern technology...

Nakhon Luang Rice Factory has a total of 8 rice raw material storage facilities, able to hold up to 240,000 tons of rice, making Nakhon Luang Rice Factory able to produce up to 1,080,000 tons of rice per year to increase the potential for storing and transporting goods. There is a large warehouse that can support product volumes of up to 3,600 tons per day.

Every step of production is produced in a closed system...

All rice that goes into the production process Will be sent from the company's 5 mills and 100 network mills across the country that have passed the quality standard certification and deliver rice with a complete transportation system to the environmentally controlled rice storage facility of the Nakhon Luang Rice Factory to wait for production in the next step.

Quality Conscious And Cleanliness...

Rice samples are also collected for inspection to ensure that every grain of rice that leaves the Nakhon Luang Rice Factory is clean, safe, and free from contaminants that are harmful to consumers.

Control standards with modern technology...

Nakhon Luang Rice Factory has brought modern technology into the production process
Every production step is controlled by a computer system.

Until it became this bag of Chat Brand rice...

That is ready to go to the market both domestically and around the world with convenience and speed in loading and unloading goods through the new water transportation port on the Pa Sak River under the Ayutthaya Port and ICD Co., Ltd. with a length of 276 meters, mooring ready. Can accommodate up to 5 ships at a time, supporting up to 400,000 containers per year.

And most importantly, this water transport port is also considered a point of transporting goods by water. Thailand's new, most modern and complete water container transport From Ayutthaya Pier and ICD Connect to Bangkok Port. Laem Chabang Port and other private ports along the coast

CP CORE VALUE

Our Operation And Our Approach To Business Are Deeply Rooted In The Six Core Values, Which Provide A Solid Foundation On Which The Group Can Grow. They Have Been An Intrinsic Part Of How We Conduct Business Since Our Foundation And They Have Helped Us To Advance And Grow Our Business Sustainably With Integrity.

Our Business Should Benefit Not Just Our Company And Our Employees But Also The Communities We Engage With And Country We Operate In.

Modern Business Must Be Fast-moving Without Compromising On Quality, adapt To New Circumstances, Adopt The Latest Technologies.

We Have Operated Our Business With Integrity, This Remains As Key Pillars Of Our Philosophy.

We Committed To Implementing Technology And Innovation To Streamline Our Systems And Operations.

We Actively Encourage Innovation In Our Employees And Our Goal Is To Foster Innovation Across All Our Businesses To Enable Us To Deliver Best Products And Services To Customers

Our Key Strategy Is To Embrace Changes Which Are From Political Events And Environment Issues Through To Consumer Needs And Technological Development.

SUSTAINABILITY MANAGEMENT

In addition to delivering value through quality products and services that meet the expectations of customers and consumers, C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service C.P. Group believes that for a business to operate in a sustainable manner, it must be based upon social and environmental responsibility in accordance with the principle of Sufficiency Economy. This is illustrated through our Three-Benefit Principle, which aims to create benefits for the country, the people, and the company. We also apply the C.P. Excellence Management Approach to our business operations to consistently develop the Group's human resources.

Furthermore, Rice Business Transport and Service C.P. Group is committed to operating our businesses in a sustainable manner beyond compliance of rules and regulations, and standards of the countries in which we operate. This is achieved by complying with international sustainability guidelines, such as The Sustainability Rice Platform(SRP), the UN Global Compact, UN Guiding Principles on Business and Human Rights (UNGPs), and UN Sustainable Development Goals (SDGs).

MATERIALITY ASSESSMENT RESULTS

INDUSTRY FOCUSED

The assessment of key material issues based on factors relating to the Group and other companies in the same core industry.

INTERNAL FOCUSED

The assessment of key material issues based on fundamental factors relating to the Group's internal operations.

EXTERNAL FOCUSED

The assessment of key material issues based on issues that are of interest to external stakeholders.

FUTURE FOCUSED

The assessment of key material issues based on issues that are of interest to leading organizations in the industry relating to the Group, and investor's perspectives.

MATERIALITY ASSESSMENT RESULTS

The content and quality of this report has been determined by considering C.P. Intertrade's operations as a foundation as well as the material issues impacting the economy, society, and environment, from the perspective of both internal and external stakeholders. Through this process, C.P. Intertrade is able to communicate to its stakeholders on its commitments and performance, in line with the strategic sustainability framework. Furthermore, C.P. Intertrade has adopted the Global Reporting Initiative (GRI) Sustainability Reporting Standards in accordance with 'Core' option as the framework for report preparation. Both internal and external factors relevant to the Group's operations have been considered for inclusion in the materiality assessment. In conducting the assessment, the business carries out various processes and steps in accordance with the 10 GRI Standards' principles for defining report content, which consist of Stakeholder Inclusiveness, Sustainability Context, Materiality, and Completeness; and for defining report quality, which consists of Accuracy, Balance, Clarity, Comparability, Reliability, and Timeliness. The key processes and stages of the materiality assessment are discussed below.

IDENTIFICATION OF MATERIAL ISSUES FOR CPI AND OUR STAKEHOLDERS

Identify sustainability issues that are relevant to our business by taking into consideration the scope expansion of this Report to our global operations across different industries relevant to ours. The Identification process went through different stages as shown below:

- The key issues from the sustainability workshop in 2022 jointly between the executives. Including gathering information from partners for consideration, Then there is a review every year
- The results of the 2022 review of significant issues of the C.P. group and business groups are the information for the preparation of this report.
- Comparing the sustainability issues of companies in industries related to C.P. Intertrade and companies in the Rice Business Transportation and Service, including the Sustainable Development Goals (SDGs), the United Nations Global Compact , World Business Council for Sustainable Development (WBCSD), Dow Jones Sustainability Index (DJSI).
- Identify stakeholder groups from partner survey data. Group of stakeholders of the Group and information on groups of stakeholders from the Social Responsibility Standards (CSR) into 14 groups.
- Gather important issues of the companies in the group with sustainability reports and set up a forum to hear opinions with additional stakeholders from the survey questionnaire.

PRIORITIZATION

- Sustainability Management Committee meeting to consider information on important sustainability issues classified by stakeholder group which is the data from the survey results and important issues of the Group.
- Employee representative survey Group management team and online stakeholder representatives
- Prioritized our material issues that were identified in Step 1 by our internal and external stakeholders. The Prioritization process went through different stages as shown below:
 - Set the weight of the business group.
 - Determine the weights for each stakeholder group.
 - Calculate the importance score to stakeholders.
 - Calculate Business Critical Score.
 - Create a Materiality Matrix.

VALIDATION AND CREDIBILITY

Validated sustainability reporting process in line with the GRI Standards, and its 4 principles.

The Validation process went through different stages as shown below.

YOUNG AGRICULTURE FOR SUSTAINABILITY

Charoen Pokphand Group operates its business under the determination of 3 benefits, which is to create benefits for the nation, the people and the organization, with the idea for social development along with building business growth. Young Agriculture for Sustainability Project Born from the idea of transferring agricultural knowledge to Thai children who have agriculture as the economic foundation of the country. By targeting youth around the establishment (factory, farm, farm pro) organize training to educate and create demonstration plots for real practice.

Implemented the project for the 3rd year in a row, Sustainable Development Goals of HEART Group, Education and Reduction of Inequality in Rice Business Transportation and Services and Map 1 Developing Education of the Office of Social Activities Integrated Crop business, rice business, Transportation and Service, targeting 100,000 people by 2030.

OBJECTIVE

1. To produce safe food stocks, support the lunch project enhancing food according to the principles of nutrition rotation in school.
2. To insert agricultural knowledge through learning-based activities and integrated training.
3. To build on the output of the school, the knowledge can be transferred to the school network and the community.
4. To join forces with executives and employees of CSR SPIRIT, volunteering to do activities with the community to contribute to society according to the 3 benefits.

AREAS FOR IMPLEMENTING THE YOUNG AGRICULTURAL PROJECT FOR SUSTAINABILITY

1. Wat Lamut School
Phra Nakhon Si Ayutthaya Province
2. 26 Soi 4 Left School
Lopburi Province
3. Chomchol Ban Khonthi School (Prasit Uppatham)
Kamphaeng Phet Province

NATIONAL CHILDREN'S DAY

The project has been carried out continuously every year since 2009 until the present, for a period of more than 13 years. The format of activities is divided into 2 types:

1. Organizing academic skills competitions such as painting contests, essay competitions, quiz competitions, etc.
2. Organizing community participation activities by organizing learning bases through games and organizing lunch and giving away stationery sets.

In 2022, National Children's Day has been organized under the concept of "Modern Thai Children Care about the environment" to make Thai children aware of the importance of environmental changes that affect human life. Therefore, it is necessary to cultivate the conservation of natural resources and the environment. There were 3,985 participants.

TARGET AREA

Surrounding areas where business is conducted both domestically and abroad include:

1. Nakhonluang Rice Factory
2. Wang Daeng Rice Factory
3. Buriram Rice Mill
4. Suphanburi Rice Mill
5. Kamphaeng Phet Rice Mill

HUMAN RESOURCES MANAGEMENT

C.P. Intertrade believes that our people are the most valuable asset – they are the driving force behind the achievement of our aspirations. This is especially the case today, as CP Intertrade is committed to growing its business and expanding investments globally. There now arises the challenge of creating ‘New Generation Leaders’ who will carry forward the organization’s values, while preparing and developing over 300,000 employees across our diverse businesses with the necessary knowledge and skills, and mindsets to embrace and adapt to changes, as well as to reinforce positive experiences for our employees to be proud for taking a part in CP Intertrade’s success.

Central to this is CP Intertrade ‘Workforce 4.0’ Human Resources Strategy, which is guided by the Six Core Values, digital information, and technology. The strategy consists of five core pillars and focuses on developing up a new generation of leaders through real-life learning experiences, with the CPLI being central to these efforts. It also focuses on creating a human resources management ecosystem to promote recruitment of ethical and competent individuals, learning from various world-class advisors, career planning and development, and transforming to an ‘agile’ organization to enhanced the Group’s adaptability to business changes and changes prompted by generational gaps.

HEALTH PRODUCT RESEARCH AND DEVELOPMENT CENTER

CP Intertrade is determined to research and develop products to improve consumers' health and well-being, including continuously introducing new products through research and development that leverage modern food technology and meet international standards. To achieve this, the Group established a food research and development center that supports expert food researchers' and developers' creativity and showcases their ability to test new products and emphasizes their determination to research and develop healthy products. Furthermore, different people have different food demands at different ages, and therefore it is necessary to develop food innovations that promote a good quality of life for global consumers. To accomplish this, they use pilot factories to test and develop products that can immediately respond to different market demands.

The Company has developed products for better health and well-being in response to vastly changing consumers' food consumption trends. Consumers currently consider the benefits and nutrition of food as their top priority. C.P. Intertrade have continuously produced products for better health and well-being at research and development center is in Nakhon Luang District, Phra Nakhon Si Ayutthaya Province.

MANAGEMENT GUIDELINES AND MANAGEMENT OF HEALTH PRODUCT INNOVATION

MANAGEMENT APPROACH

Promoting health and well-being for all people is a common priority for all countries. CP Intertrade views this as an opportunity to develop products and services using our expertise in agribusiness and food, retail and distribution, and pharmaceuticals.

The Group is committed to investing in research and development, operating according to international standards, controlling and monitoring quality throughout the value chain, and promoting understanding of good nutrition for society. We focus on increasing the capacity of our employees (People), developing processes based on international standards (Process), offering products for promote good health and well-being (Product), and promote understanding of health issues (Promotion of Health) by providing product information and initiatives.

PEOPLE

We strongly believe that to produce safe, high quality food, we must look to the quality of our employees. Therefore, we invest heavily in the recruitment, training and development of our staff, working with industry experts to ensure that we are able to efficiently manage risk and quality control. This is important along the entire value chain from the sourcing of raw materials through to manufacture and delivery to our consumers.

PROCESS

We believe good manufacturing processes require good systems and standards. As a result, we are continually improving our food quality and safety systems, using laboratory analysis, automation, traceability systems and regular certification to international standards, such as ISO/IEC 17025 accreditation, by both internal and external parties.

★ ISO 9001:2015 ★ GHPs ★ HACCP ★ BRC Issue 8 ★ FSMA ★ FDA standards

PRODUCT

We believe that product innovation plays a vital role in improving health and well-being, and are dedicated to investing in it. We have created more diverse product ranges, improving both taste and nutritional value and continue to do so. We also focus on developing new products for different target groups, including functional and medical foods.

PROMOTION OF HEALTH

We believe that clear and accurate product information can help consumers make good decisions. As a result, we have a strong focus on communicating clear, accurate, and sufficient information to our customers. In addition, we engage in a number of projects to support public education on appropriate levels of consumption, food hygiene and nutrition as well as initiatives that provide consumers with better access to nutritious food products.

POPULAR "KHAO TRACHAT" PRODUCTS

The company strives for and intend to produce to achieve consistent quality as the saying goes

“KhaoTraChat, standard in every bag the same all over the world.”

Until we are accepted and trusted by millions of consumers.

#KhaoTraChat, the number 1 rice in my heart we all

JASMINE RICE

About deliciousness, fragrant, soft, sticky because we use the technology to store the freshness of rice. With 15 °C cooling technology, it's like eating just harvested rice. **Delicious all year round, no need to wait for the season.**

CHAT SOM BRAND: FRAGRANT RICE, SPECIAL RECIPE,

About cooking in the pot, the price is worth it, will cook it as steamed rice or make a menu of chicken rice, red pork rice, pork leg rice and fried rice. It's delicious to make any dish.

RD43 RICE : CHAT LIGHT BRAND

Less sugar, healthy but still delicious, soft, suitable for everyone in the family. people who like soft rice but also care about health want to control sugar and weight. Quality is guaranteed with the brand "RD 43" certified authentic by the Rice Department.

CHAT LITE RICE X ABSOLUTE FITFOOD READY TO SERVE “HAPPY HEALTHY BOX”

'Khao Tra Chat Lite' joins hands with 'ABSOLUTE FITFOOD', a premium health food box manufacturer. Delivery format Invite all consumers People who take care of their health Delicious and satisfying in concept “Health and deliciousness do not go hand in hand” and ready to serve Chat Lite brand rice , Khao Khor 43, “Fragrant, soft rice, low sugar” paired with mouth-watering food menus. There are more than 300 food items for you to choose from with “Happy Healthy Box By Absolute Fitfood” created by a nutritionist and a team of professional chefs. Make it a matter of controlling your weight. It has become very easy.

"Chattra Lite Rice" is another good choice for health. Because it is RD 43 rice, a pure breed of rice certified by the Rice Department. It has a relatively low glycemic index (Medium To Low GI), meaning it has a GI of 57.5, while jasmine rice is 69.1, riceberry rice is 62.0 and brown rice is 57.0. Having a low GI value will help convert starch into sugar more slowly. This causes blood sugar levels to not increase quickly. Makes you feel full for a long time And it is an option for those who want to control the amount of blood sugar in their blood. It's similar to brown rice, but softer and easier to eat. And one thing is different It is a product that comes from member farmers under the Company's project to develop a sustainable rice growing system. Importantly, it is easier to eat. Because the rice is white But still have good health.

For anyone looking for new clean food at an affordable price, “Happy Healthy Box By Absolute Fitfood” is a good choice. Prices start at only 85 baht per box. By selecting quality ingredients, Clean & Lean 100%, low calorie, no oil used in cooking. Do not use refined sugar. and does not contain preservatives Ready to serve you every box at home. You can view the menu and order food at: <https://shop.line.me/@hhbox> or phone number 081-371-3721, 090-572-3065

STRATEGIES TO INCREASE SOCIAL VALUE

MANAGEMENT APPROACH

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service Group's Social Value Creation Strategy has been developed based on the core values that represent our identity, namely gratitude and honesty, the Three-Benefit Principle, the C.P. Excellence Management Approach, and the Sustainable Development Goals according to the 2030 Strategy. Besides these internal factors, the Group has also taken into account community concerns and the United Nation's Sustainable Development Goals in order to balance between meeting the community's and society's needs and the Group's business growth.

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service Group's Social Value Creation Strategy actively focuses on three keys issues, namely promoting jobs and income for farmers, supporting knowledge and increasing distribution channels for small entrepreneurs, and supporting a better quality of life for vulnerable groups. Furthermore, the CP for Sustainability Project has also been implemented to drive the strategy and encourage the engagement of executives and employees worldwide in harmonizing social activities.

SUPPORTING FARMERS (for a Better Quality of Life)

Supporting contract farmers

Four-in-One innovative projects for modern and sustainable agriculture

Knowledge, technology, and skill development & Employment of local farmers

Promoting farmers' access to funding

Social Enterprise (SE) Development

Direct purchase of agricultural raw materials from farmers

MANAGEMENT APPROACH

The agricultural sector is still an integral part of the economies of Thailand and many other countries around the world, as it is relevant to the livelihood of many people. Yet, most farmers are still in poverty due to the lack of capital, knowledge, technology, and access to markets. Meanwhile, C.P. Intertrade has the resources and can collaborate with relevant parties in order to improve the farmers' quality of life, especially to eradicate poverty as part of addressing Goal 1 of the SDGs.

CP Intertrade holistic operations seek to support farmers by developing their skills and enhancing their land management capability. Our operations prioritize programs that can create economic, social, and environmental values and align with the Four-in-One approach comprising the public sector, private sector, financial institutions, and farmers. We also support the legislation of Contract Farming and other integrated projects to ensure self-sufficiency and sustainability for farmers.

PERFORMANCE TO SUPPORT FARMERS TO GROW RICE DURING

ZERO ACCIDENT OPERATIONS STRATEGY

TRAIN THE TRAINER FOR FORKIIFT

The company has announced the appointment of a person to test forklift driving operations for the rice business. Transport and services To train and test employees responsible for using forklifts at each factory. which requires training and tested according to the standards of the Charoen Pokphand Group But with such job positions, there is frequent driver turnover. As a result, each factory faces the problem of waiting a long time to send employees to receive training and examination according to the group's standards, affecting the operation of the factory. Therefore, the above duties have been appointed for training and testing forklift driving of employees at each factory. By following the standard curriculum of the Charoen Pokphand Group.

Therefore, it is necessary to organize this training course. For the assigned person to be in charge of testing the operation of driving a forklift in the rice business. Transportation and services, knowledge, understanding and skills as an instructor Tester for driving forklifts correctly according to Charoen Pokphand Group standards. To continue issuing forklift driving certificates according to Charoen Pokphand Group standards.

CREATING AN INNOVATIVE ORGANIZATION

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service community recognizes the importance of cultivating and creating a positive attitude towards creation, innovation and development create innovation covering 3 areas: economy, technology and society. The company started by focusing on the operations of the operational staff. By focusing on employees to solve problems on-site by themselves, a feedback system (Kaizen Suggestion), and it provides incentives by creating a platform for employees to present their management as they develop and develop into a certain culture. Next, there is a goal for employees to work together, so there is a teamwork set.

Using the concept of QCC System allows employees to group together. Solving tougher problems, decisions are made between teams to achieve joint resolution through the CPI Project process, covering optimization, cost reduction and continuous improvement. Then focus on cooperation as “Cross Function” develop into the Innovation System process sent to “CP INNOVATION” of the group. Employees show their potential in the CPI Award performance contest with the aim of recognizing innovators who invented their work and to share. Employees’ knowledge and experience exchange, and works will be developed and upgraded to the Group’s innovation competition.

ONE DAY SATISFACTION PROJECT

From the goal of bringing values to action through a One Day Satisfaction Project by initiation Improve their own creativity which gives employees an attitude of accepting change. Satisfied with the present success in just one day and always looking for ways to work in the present. By creating new things, making difficult things easy or do it quickly and with quality to create benefits for oneself outside company or society. However, the business group has encouraged employees to invent projects in 3 forms as follows:

- KAIZEN SUGGESTION** (Lightbulb with question mark)
- CPI PROJECT** (Money bag with Bitcoin symbol and downward arrow)
- INNOVATION** (Lightbulb with hand holding it)

This concept has helped employees develop a more concrete understanding of the Group’s values, and a core part of this Project involves encouraging employees to participate more actively in projects. Afterwards, participating employees receive scores that go towards the criteria for recognizing them as a Group ‘Innovator.’

The One Day Satisfaction Project is now in its third year, and as of year-end 2022, a total of 359 employees participated in 514 work improvement projects. The participating employees also collected scores to become ‘Innovators,’ resulting in a total of 185 ‘Innovators’ from all levels. Likewise, it has enabled employees to adopt a good perspective on improving their own work through new ideas and methods. This is the idea of putting values into practice, which is one of the essential foundations for becoming an innovative organization.

PROJECT	‘INNOVATOR’ SUPPORTERS	INNOVATOR 1	INNOVATOR 2
514 project	140 persons > 10 Score	43 persons > 50 persons	2 persons > 135 persons

- Report engagement to the public

PREPARING

- Mobilize resources according to plan
- Build engagement capacity
- Identify and prepare for engagement risks

SURVEY RESULT 2022

**OVERALL
ENGAGEMENT
RESULT**

78 %

In 2022, C.P. Intertrade Co., Ltd. and companies in the Rice business Transportation and Service has commenced the formulation of the 2030 Sustainability Strategy. An in-depth stakeholder engagement survey has been conducted by an external consultant. The scope of the survey covered C.P. Group's core businesses both in Thailand and overseas. The survey employed methods such as in-depth interviews, discussions with the target audience, and quantitative opinion surveys in order to accurately learn about the needs and key concerns of each stakeholder groups. This has been carried out in addition to the customary process to gather information on stakeholder needs and expectations by the designated authority.

The process of preparing the Sustainability Report for the year 2021 of CP Intertrade Co., Ltd. and companies in the Rice business Transportation and Service, we create stakeholder engagement at the business level by reviewing the issue of hearing from stakeholders from the year 2021 through various mechanisms to examine the issues of sustainable development of the organization and listen to the opinions, suggestions and expectations of different groups so that we understand the common issues that stakeholders share the same opinion. and has been planned to respond to such issues as well as pushing for continuous improvement of operations and to meet the expectations of interested stakeholders and different expectations, the business group therefore creates a channel for stakeholder participation. Through a communication mechanism that facilitates the relationship exchange views the communication frequency of each group will vary according to plans and needs as shown in the following table:

SOCIAL ACTIVITIES PROJECT

SUPPORT THE GOVERNMENT SECTOR TO HELP THE PEOPLE

SOCIAL ACTIVITIES PROJECT

DISASTER RELIEF AND RESTORATION

Collaborate with government agencies to support Chattra Khao to help people affected by various disasters. and join in sending out units to deliver necessary consumer goods

DISASTER RELIEF AND RESTORATION

Due to the current situation, blood donations are limited by the spread of COVID-19 in order to join the campaign for blood donations to reduce blood shortage problems in the situation of the COVID-19 epidemic.

DISASTER RELIEF AND RESTORATION

To inherit Buddhism, arrange for all areas where there are establishments to organize traditional activities with the community to create good relations and be the public benefit to the community together.

VOLUNTEER "WE DO GOOD DEEDS WITH THE HEART"

Friday 25 November 2022 Integrated plant business, rice, transportation and services Charoen Pokphand Group, led by Ms. Suriya Suriyakanon, Senior Deputy Managing Director Chemical fertilizer production factory together with Mr. Wichan Noito, Nakhon Luang District Chief Along with civil servants of Nakhon Luang Subdistrict Municipality, kamnans, village headmen, students, parents, and CSR SPIRIT volunteers, join together to "do good with the heart" and perform benefits. Trimming trees, cleaning up, and adjusting the landscape around Prasat Nakhon Luang. Phra Nakhon Si Ayutthaya Province. To develop local areas and important tourist areas which His Majesty King Rama IX He once came to worship the Buddha's footprint. Expressing devotion to His Majesty's infinite grace.

CSR SPIRIT : ROYAL VOLUNTEER

At the Volunteer School Training Center 904 (Bang Khen)

Executives and volunteer employees CSR SPIRIT integrated plant business, rice, transportation and services Charoen Pokphand Group Attend training Self-reliance learning base In line with the royal volunteer spirit "We do good deeds with our hearts", graciously bestowed hat and scarf Complete with volunteer identification card To unite the power of CP volunteers, do good deeds, and do benefits for society. The company is committed to conducting business according to the 3 Benefits resolution of the Charoen Pokphand Group.

HOME

LIVING TOGETHER

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service, Charoen Pokphand Group realizes the importance of environmental sustainability by operating the business under the concept of the use of natural resources for maximum benefit along with the organization's business principles under The concept of "Green Culture" is instilled in the activities of the people in the organization, conveying the brand and its products. To achieve our vision to be a leading company in integrated rice and industrial Argo business within the framework of this vision.

Mission and Policy : Safety, Occupational Health, Environment Energy and efficiency Therefore, setting the following environmental sustainability goals.

**CLIMATE
RESILIENCE**

CIRCULAR ECONOMY

WATER STEWARDSHIP

SUPPORTING THE SDGs

SDG 7

Affordable and Clean Energy

- 7.2 Increase substantially the supply of renewable energy in the global energy mix
- 7.3 Double the global rate of improvement in energy efficiency

SDG 11

Sustainable Cities and Communities

- 11.6 Reduce the adverse per capita environmental impact of cities

SDG 12

Responsible Consumption and Production

- 12.2 Achieve the sustainable management and efficient use of natural resources
- 12.3 Halve per capita global food waste
- 12.5 Substantially reduce waste generation

SDG 13

Climate Action

- 13.3 Improve education, awareness-raising and human and institutional capacity on climate change

OPPORTUNITIES AND CHALLENGES

The challenge of climate change impact, C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service, Charoen Pokphand Group business has foreseen the opportunity from change to drive and support for all business groups.

A company that is committed to trying to reduce greenhouse gas emissions and continuous monitoring measures. The company is committed to climate change management, and contribute to reducing the impact on the environment. Adhering to the relevant international principles Integrated with business operations principles that focus on the impact of climate change. In addition, there is support for the government's greenhouse gas reduction mechanism, and a focus on products that have been certified for carbon labels (Carbon footprint). from this commitment, The company aims to reduce the use of plastic for packaging for reuse. Net zero carbon dioxide emissions.

2030 GOALS

Reduce Direct and indirect greenhouse gas emissions (Scope1 and Scope2)

Carbon Neutral

ASSESSMENT OF CLIMATE-RELATED RISKS AND OPPORTUNITIES ACCORDING TO TCFD

The company has in place a framework for managing climate change that covers our entire supply chain. We determine policies and targets that encompass energy efficiency, renewable energy use, waste management, and reductions in plastic packaging. We further assess climate risk and opportunities, conduct scenario analyses according to the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD), and develop comprehensive risk management plans that include physical, market, policy and regulatory, and reputational risks. technological

CLIMATE CHANGE MANAGEMENT FRAMEWORK

RISKS

POLICY & LEGAL

Policies, international regulations, and various other tools heighten control of greenhouse gas emissions according to UN requirements.

TECHNOLOGY

Emerging climate change technologies may impact current marketing efforts.

MARKET

Policies or investments in businesses or low-carbon products reduce the need for high-carbon emitting products.

REPUTATION

Higher expectations of stakeholders contribute to a decrease in revenue, reputation, and brand value.

PHYSICAL RISKS

Natural disasters, changing sea levels, coastal erosion, higher incidences of drought owing to higher temperatures, the impact of warming on human fatalities, and the spread of pandemics affect both plants and animals, among others.

OPPORTUNITIES

RESOURCE EFFICIENCY

The efficient use of renewable energy and reduction in energy costs.

ENERGY SOURCE

More diverse energy sources for manufacturing operations.

PRODUCTS/SERVICES

The increase in development of new low-carbon products and services to market, to respond to the changing needs of consumers.

MARKET

Marketing efforts that align with trends in climate change to create and enhance competitiveness.

RESILIENCE

Reputational opportunities and increase in brand value.

GOVERNANCE

Establish committees at both the Group and Business Group levels, to manage the company's climate-related risks and opportunities.

STRATEGY

Outline a strategy for climate change management that aligns with our Group-level financial strategy and planning.

GOVERNANCE

Apply risk and opportunity assessment results and integrate the local context of operations in each country to develop climate change management approaches.

STRATEGY

Determine indicators and targets for assessing and managing climate related risks and opportunities that align with the Group's risk management.

*Task Force on Climate-related Financial Disclosures (TCFD)

GUIDELINES FOR MANAGING GREENHOUSE GAS EMISSIONS

GOAL

GOAL ENVIRONMENTAL INFORMATION THAT SUPPORTS THE COMPANY'S OPERATIONS ACCORDING TO VARIOUS COMMITMENTS ON CLIMATE CHANGE

ACTIVITIES

Life Cycle Environmental Impact Data

Baseline emission data from food loss and food waste data in Rice and Corn planting

Food loss and food waste in the production supply chain

OUTPUT

Determine the system scope and goals of the LCA study

Analyze the inventory data on the given reference unit

Assess the environmental impact of the product

Prepare a report showing the list of items and environmental impact values

Organize a small group discussion with the Company's coordinator and the owner of the information

Collecting and analyzing soil samples and GHG from pilot plots of the company (rice and corn)

Use the SMART GHG app. Collect samples of plant cultivation activities.

Compare the measured emissions and values obtained by using SMART GHG app.

Define the conceptual framework, theories, models used in operations.

Conducting tests in the field and laboratory

Store and collect information.

ASSESSING ENVIRONMENTAL IMPACTS THROUGHOUT THE LIFE CYCLE OF RICE CULTIVATION IN PILOT PLOTS

WASTE MANAGEMENT

Waste management is an important aspect of all process along C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service Charoen Pokphand Group's value chain. In 2022, the Group announced the implementation of the Waste Management Policy, which is part of the Group's Environmental Policy and Guidelines, providing direction for all business groups to strive towards achieving the zero-food waste and zero waste to landfill goal by 2030. Waste management guidelines have been defined as follows:

Announce zero food waste and waste landfill goal by 2030

Publish Waste Management Policy

Formulate waste management plan according to the 9Rs circular economy system management approach

Communicate and raise awareness to urge employees to work together to achieve goals

Monitor performance and progress against goals through annual Sustainability Reports

FOOD LOSS AND FOOD WASTE MANAGEMENT

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service Charoen Pokphand Group's core businesses include production and distribution of food and beverages. We take into account food loss and food waste management throughout the supply chain from the process of crop cultivation and animal farming through to customer consumption. The Group is committed to reducing food loss and achieve the goal to eliminate food waste and waste to landfill by 2030.

COMPACT SIZE

PROJECT SOURCE

"Reduce the use of plastic. It can help reduce global warming..." is the sentence that sparked the team to start studying this project. Currently... there is no raw material that is more flexible, lighter weight and lower cost price Can be used to replace plastic. Reducing the amount of plastic used is therefore one option that can help reduce the amount of waste that occurs from single-use plastic. It also helps reduce costs in the production process. This project studied plastics in film form. (Polyethylene: PE) that was used to combine 6 bags of 5 kilograms of rice products. The factors that determine the size or amount of plastic used It depends on the volume of rice bags stacked inside. and setting up the combiner to use plastic, leaving as little scrap as possible.

which concluded that Reducing the entire width and the length of the combined film Helps the combined products to be more compact. It can also reduce costs by 2.82 million baht per year and reduce the amount of plastic used by 33.7 tons of plastic per year.

RESULTS

1. The combined packaging price, which has been reduced by area, is 0.1902 baht per kilogram of rice. The cost reduction difference is 0.0259 baht per kilogram of rice. Total product packaging size of 5 kilograms, combined with 6 bags, year 2022 = 109,041.120 tons, total cost reduction of 2,824,165.01 baht.

From the research and design results, it was found that

2. Get combined packaging that is more compact in size to match the products inside.
3. Reduce plastic use by 33.7 tons per year.
4. Reduce carbon emissions by 70 tons per year.

GUIDELINES FOR ACTION

1. Take advantage of the project "Overlap air-seal" to help ventilate the bag. To control the air to be less and has the same amount in every bag
2. Measure the circumference of a tube for forming a composite film. To reduce the width of the film that is too much
3. Adjust the product support base of the combined machine to be higher. To reduce the clearance level before sealing. Helps reduce the length of the film that is too much.
4. Test the machine continuously for a period of 1-2 hours. Test moving. and product arrangement To record the actual product packing results

POINT OF DIFFERENCE

SET ZERO WASTE

FLAT DIN DAENG COMMUNITY

Join in cultivating awareness of proper waste management with the Set Zero waste project at Flat Din Daeng Community. Campaign for waste separation through activities to collect points from the sale of garbage. Every 25 baht receives 1 stamp. Collect 3 stamps and receive 1 kg of new Chat brand jasmine rice. The collection period is from October - December 2022 with stamps being exchanged. For event participants when Last Sunday, December 18th, there were 132 people who received the most stamps, exchanging 44 kg of rice from the exchange for new Chat brand jasmine rice, totaling 150 kg.

Total waste management such as paper, plastic bottles, aluminum cans, and glass bottles has resulted in stimulating community cooperation. Campaign for proper waste management.

WATER STEWARDSHIP

(GRI 103-1, 103-2, 103-3, 303-1, 303-3)

SUPPORTING THE SDGs

SDG 6

Clean Water and Sanitation

- 6.3 Improved water quality through safe treatment and recycling
- 6.4 Increased water use efficiency and ensure sustainable supply
- 6.5 Implement integrated water resources management
- 6.B Support the participation of local community in improving water and sanitation management

SDG 12

Responsible Consumption and Production

- 12.2 Achieve the sustainable management and efficient use of natural resources
- 12.3 Halve per capita global food waste
- 12.5 Substantially reduce waste generation

SDG 14

Life Below Water

- 14.1 Reduced marine pollution

OPPORTUNITIES AND CHALLENGES

Half of the world's people will suffer from water scarcity if it also uses abundant water. World Economic Council states that water resources issues. It is one of the most important issues in the year. The security of natural resources, especially clean water, is an issue that the private sector needs to focus on. Factors that are important to running a business. The challenges and importance of maintaining water resources throughout the supply chain by striving to manage water resources throughout the value chain are necessary. Continually develop processes, technology, innovation, and infrastructure to respond to this change to drive efficient water management.

2030 GOALS

Reduce the amount of water used per unit of income by 10% compared to base year 2020

WATER CONSERVATION

MANAGEMENT APPROACH

Our business operates on water stewardship under the UN Global Compact and Water Stewardship policy, and the Water Stewardship Framework. These serve as guidelines, facilitating the business to achieve its strategic goal to assess water scarcity risk.

WATER STEWARDSHIP MANAGEMENT FRAMEWORK

INTEGRATED WATER RISK ASSESSMENT

Enabling a good water management plan throughout the supply chain

Our business has developed a water resources risk assessment framework that is applied across all of its units and Business Groups. The assessment evaluates risk factors in various dimensions, including the volume of water withdrawal by organization, and baseline water stress levels. Our business has adopted the internationally-recognized Aqueduct Water Risk Atlas tool of the World Resources Institute (WRI) for use as our preferred assessment tool. The results of the assessment are ranked according to three levels of water risk and are then used to develop appropriate management plans.

WATER RISK ASSESSMENT FRAMEWORK

**BASELINE
WATER STRESS**

**WATER
WITHDRAWAL**

**WATER MANAGEMENT
PLAN**

Low - Medium

Low – Medium volume
High volume

**High - Extremely
High**

Low volume
Medium volume
High volume

Level 1: Low Risk

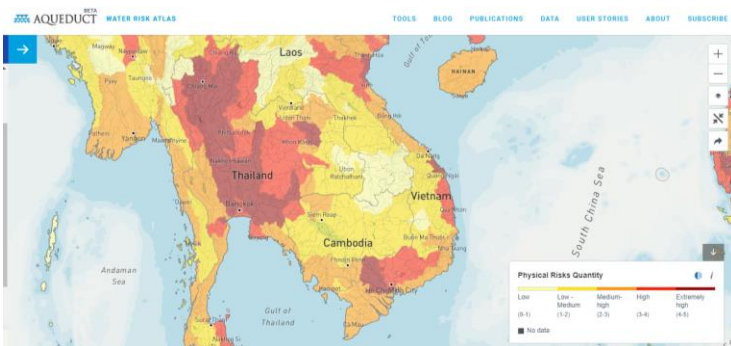

- Regularly monitor water withdrawals through reporting systems

Level 2: Medium Risk

- Assess local-level risks using the 'Local Water Tool'
- Improve water use efficiency using the '5Rs' principle
- Regularly monitor water withdrawals through reporting systems

Level 3: High Risk

- Assess local-level risks using the 'Local Water Tool'
- Improve water use efficiency using the '5Rs' principle
- Regularly monitor water withdrawals through reporting systems
- Assess water risks for key suppliers

The risk assessment conducted reveals that **86%** of all business units under operating in areas with water scarcity risk, some of which may involve high risk.

Units in the Group categorized according to water scarcity risks

- 14% Extremely high water scarcity risk
- 43% High water scarcity risk
- 29% Moderate water scarcity risk
- 14% Highly sufficient water level

WATER MANAGEMENT FOR SUPPLIERS

Enabling water management planning throughout the supply chain

MANAGEMENT APPROACH

C.P. Intertrade Co., Ltd. and companies in the Rice Business Transportation and Service is committed to using water resources sustainably and implementing effective water management throughout the entire supply chain. In view of this, the Group has developed a management approach for our suppliers who are the key stakeholders to our business with the aim to promote water-use efficiency, reduce water shortage risks, and jointly campaign for the conservation of water resources.

WATER RISK ASSESSMENT

Conduct water risk assessment for suppliers to classify them by water stress level using internationally recognized tools

SUPPLIER WATER MANAGEMENT AUDIT

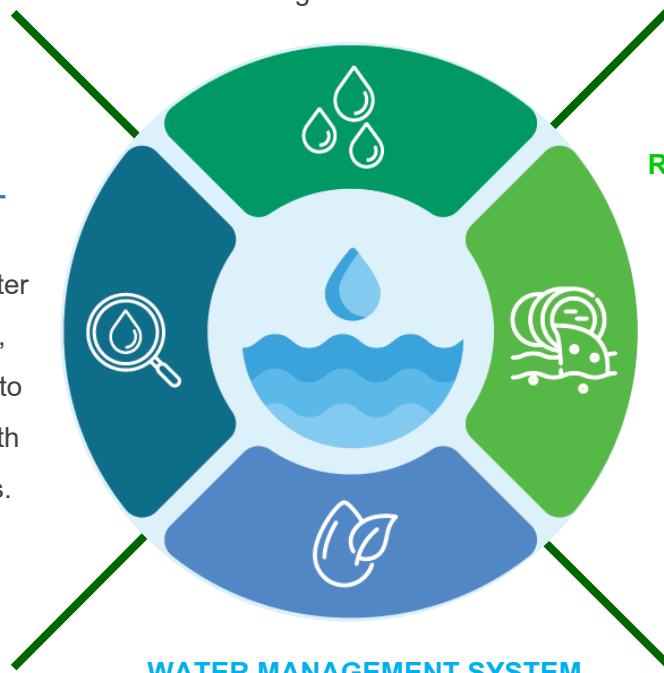

Evaluate suppliers' water management system, wastewater treatment to ensure compliance with wastewater standards.

PROMOTION OF WATER RESOURCES CONSERVATION ACTIVITIES

Collaborate with suppliers in promoting water-saving measures as well as provide knowledge and understanding about the importance of water resources conservation

WATER MANAGEMENT SYSTEM

Collaborate with suppliers in water management planning to optimize water-use efficiency

CHAT KASET TO KNOW :

Show ideas to measure water level in modern rice fields!!!

FLAT DIN DAENG COMMUNITY

The "water level" in rice fields is important for rice growth as well as beneficial for weed control. By providing water that efficiently. The water needs of rice must be taken into account in each growing period, which is divided into 4 stages: seedling stage, tillering stage, and gestational flowering stage milk and cooked rice.

Therefore, the farmer must constantly measure the level of the plot appropriately. The wisdom that has been used since the past is that "water pipes" can be easily made by using a PVC pipe, 30 cm long, 4 inches in diameter, drilled 4-5 rows of holes around the pipe, each hole is 5 cm apart from Then buried 30-40 cm deep into the soil, allowing the mouth of the pipe to emerge 5 cm above the soil surface. (or if the soil is dug before the pipe is buried, the soil is not removed) to allow the water in the field to flow into the drilled hole.

Usually the peasants you will have to look at the water level in this pipe from time to time. In order to maintain the water level appropriately (so it should be equalized across the plot for water level accuracy) if there is enough time there should be no problem. But if a person has little time, there are many fields, and each plot is far apart will take the same time.

"Mr.Itthipol Channum" is one of the farmers. Generation children-grandchildren which inherited from ancestors with a regular career. Therefore, there is not much time. Let's come to see the water in the field every day. I can't do it. Makes you think of solving problems using technology to help try to see that. What technology is that?

POLICY ANNOUNCEMENT

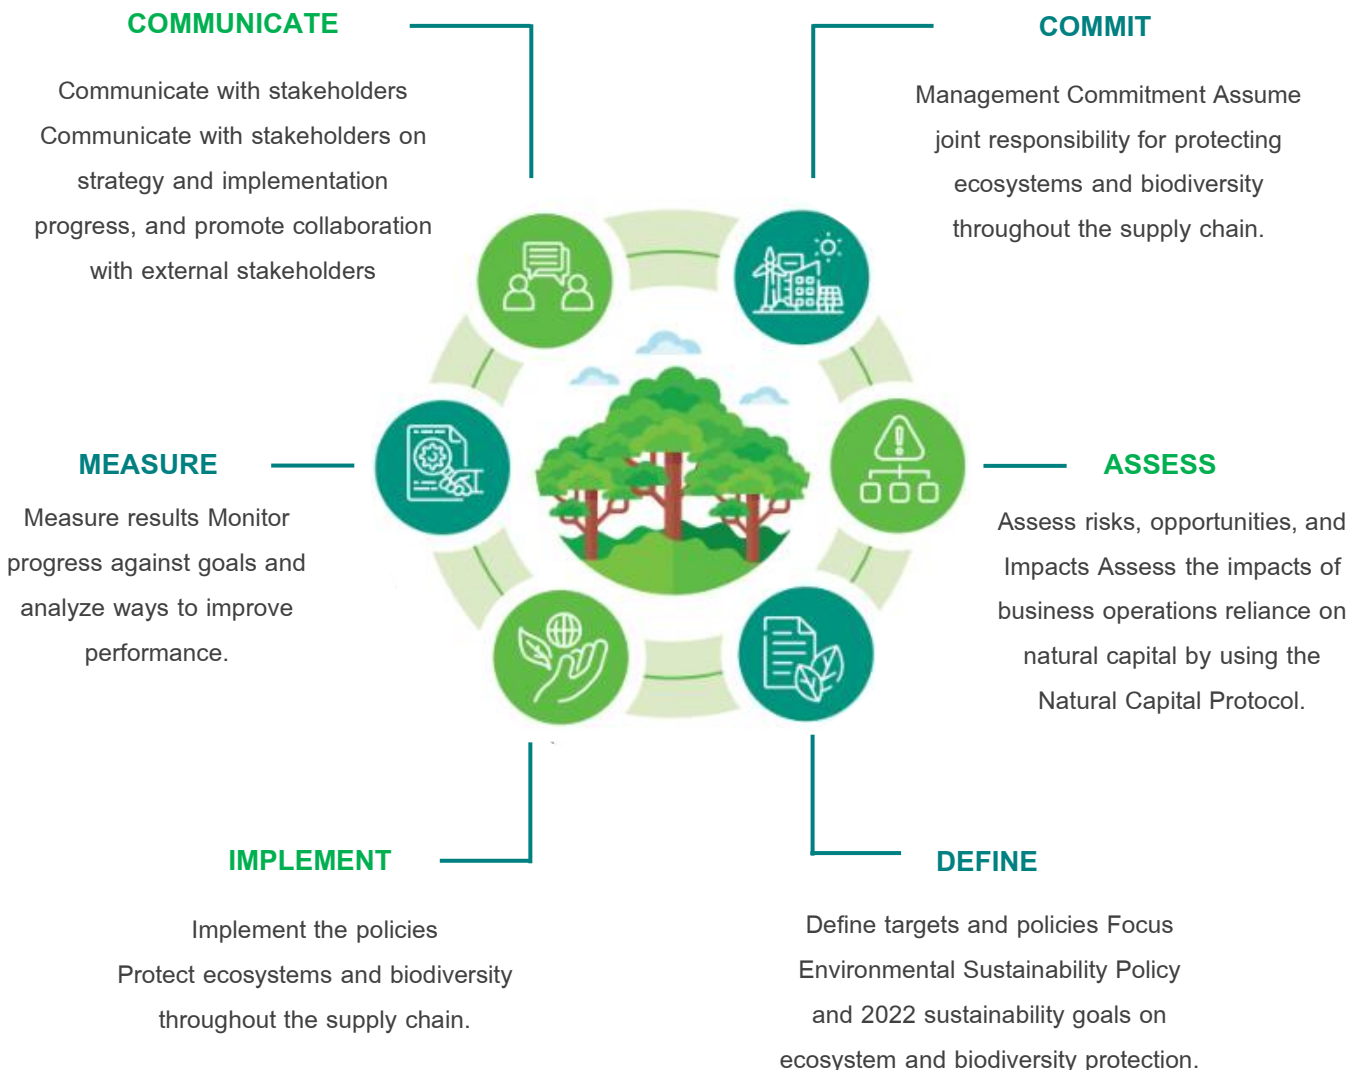

Environment and biodiversity policy

ECOSYSTEM & BIODIVERSITY PROTECTION

MANAGEMENT APPROACH

Our business is committed to operating responsibly and conserving the environment to protect biodiversity. We have upheld these principles from the very start, by choosing to operate on sites that are not located within natural resource and environmental conservation areas. We also strictly adhere to rules, regulations, standards, and ministerial regulations; conduct regular impact assessments and implement measures to protect and mitigate the impacts of our business operations. In addition, the Group focuses on agricultural raw material sourcing, making sure that raw materials come from responsible sources that do not encroach upon forest and marine resources. Finally, we encourage the protection and restoration of terrestrial and marine ecosystems to ensure ecosystem balance and biodiversity.

ECOSYSTEM AND BIODIVERSITY PROTECTION FRAMEWORK

RAW MATERIAL SOURCING AND TRACEABILITY

Building confidence for consumers

MANAGEMENT APPROACH

Consumers are now more attentive to product information. Information on labels that indicate properties and expiration dates may not be enough for the consumer when they still want to know where the product was made, quality in the manufacturing process, how well it was made. Safe, non-contaminated and other information that will help build confidence in food and merchandise purchases.

The traceability system has therefore played an increasingly important role in providing food routing information from ingredients, Through the production process until it reaches the consumer. It also helps manufacturers reduce the loss of product recalls, which can be retrieved accurately, precisely and quickly.

The company has developed a comprehensive information system and traceability process from farmers to consumers, which can be considered as a model for developing such processes in the rice business supply chain.

RISK ASSESSMENTS

The company has developed a self-assessment system.

Sustainability for business partners used as a selection criteria new business partner with business partners in the main raw material group for risk management in the supply chain.

DEVELOP BUSINESS PARTNERS

The company has a policy of sustainable procurement and guidelines for business partners to create participation and exchange of knowledge with business partners, communities, farmers, independent organizations, and government sectors to develop business operations capabilities and promote standards of Responsible sourcing throughout the supply chain.

COMMUNICATION

Our company progress report to Charoen Pokphand Group and its partners through the Sustainability Action Conference and annual sustainability report.

MEASURING NATURAL CAPITAL TO PROTECT ECOSYSTEMS AND BIODIVERSITY

C.P. Intertrade Co., Ltd. has cooperated with Charoen Pokphand Group entry as a member of the World Business Council for Sustainable Development (WBCSD), we brought in the Natural Capital Protocol a natural capital assessment framework developed by WBCSD in collaboration with global organizations including Conservation International, The B Team, PwC, and Sustain Value to use as a framework for measuring the organization’s natural capital.

The Protocol helps us to understand the capacity and degradation of ecosystems and biodiversity, to value them in economic terms, and to apply those valuation results to identify ways of balancing between using and protecting natural resources. Ecosystem and Biodiversity Protection Framework the impacts of our business operations. In addition, the Group focuses on agricultural raw material sourcing, making sure that raw materials come from responsible sources that do not encroach upon forest and marine resources. Finally, we encourage the protection and restoration of terrestrial and marine ecosystems to ensure ecosystem balance and biodiversity. The Group selected the Nakhon Luang Rice Mill, under C.P. Intertrade Company Limited and Khao C.P. Company Limited, as the pilot site for the natural capital assessment. We selected this site because the rice mill is located on the banks of Pa Sak River in Nakhon Luang District, Ayutthaya Province, and uses the river’s waterways to transport goods quickly and efficiently through the AyutthayaTherefore, the Group was able to realize the importance of determining the ecosystem and biodiversity value of this resource Port and Inland Container Depot (ICD). Given this, the Nakhon Luang Rice Mill directly benefits from these waterways, and it is possible to witness both the impacts from and dependencies on this natural resource. as key natural capital for the rice mill.

NATURAL CAPITAL PROTOCOL FRAMEWORK

Principles: Relevance, Rigor, Replicability, Consistency

CSR SPIRIT : ROYAL VOLUNTEER

At the Volunteer School Training Center 904 (Bang Khen)

Executives and volunteer employees CSR SPIRIT integrated plant business, rice, transportation and services Charoen Pokphand Group Attend training Self-reliance learning base In line with the royal volunteer spirit "We do good deeds with our hearts", graciously bestowed hat and scarf Complete with volunteer identification card To unite the power of CP volunteers, do good deeds, and do benefits for society. The company is committed to conducting business according to the 3 Benefits resolution of the Charoen Pokphand Group.

CSR TERM : VOLUNTEERING DURING THE SCHOOL BREAK

Critical Supplier

RESPONSIBLE SUPPLY CHAIN MANAGEMENT

MANAGEMENT APPROACH

Our business focuses on managing supply chain by defining management procedures as a guideline for all companies in the business group to provide supply chain management go in the same direction In supply chain management, the business group starts from communicating manuals. Code of Conduct for Partners to all business partners for business partners to be aware of the policies and Expectations of the business group and can work together continuously.

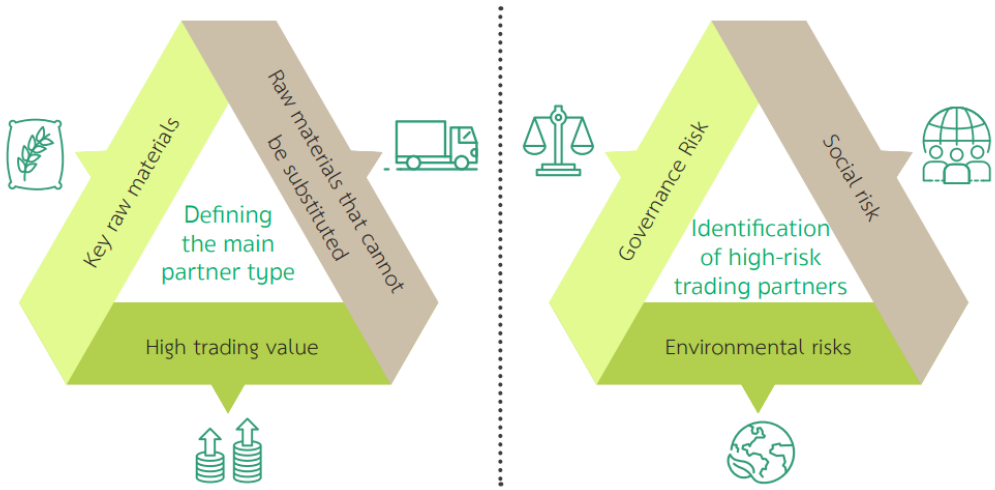

RAISING AWARENESS AND RISKS

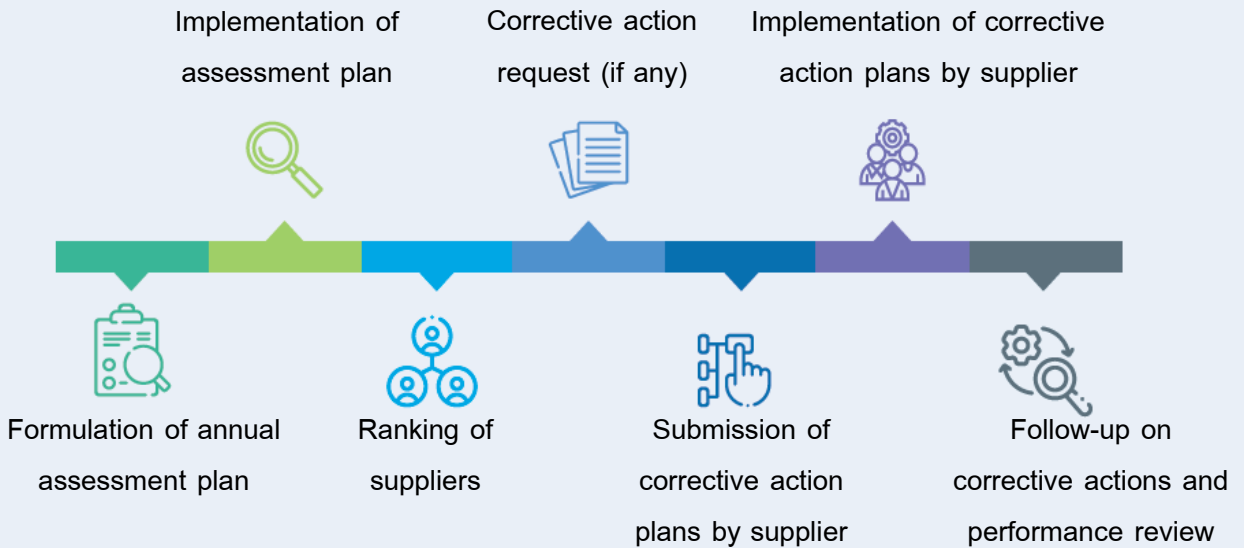

There are many business related business operations. Our business group has received a policy from the Charoen Pokphand Group and is committed to raising awareness of responsible supply chain management. with major business partners first (Critical Suppliers). The principles used to classify the main trading partners are as follows:

1. Suppliers of key raw materials.
2. Suppliers who are suppliers of key raw materials that cannot be substituted.
3. Partners with high trading value.

In addition, it was identified to find business partners who are at risk by assessing sustainability risks throughout the supply chain through two-dimensional assessment criteria, namely the severity of the impact. and the likelihood of risk, which the risk issue used in the assessment is taken from the channel. They are as follows: 1) news, 2) past performance, 3) industry-related risk factors, and 4) trends and potential risks in the future. The risk assessment covers raw materials packaging groups and service providers who are not limited to only the 1st business partner (Tier 1) who directly buy-sell but also include other business partners (Non-Tier 1).

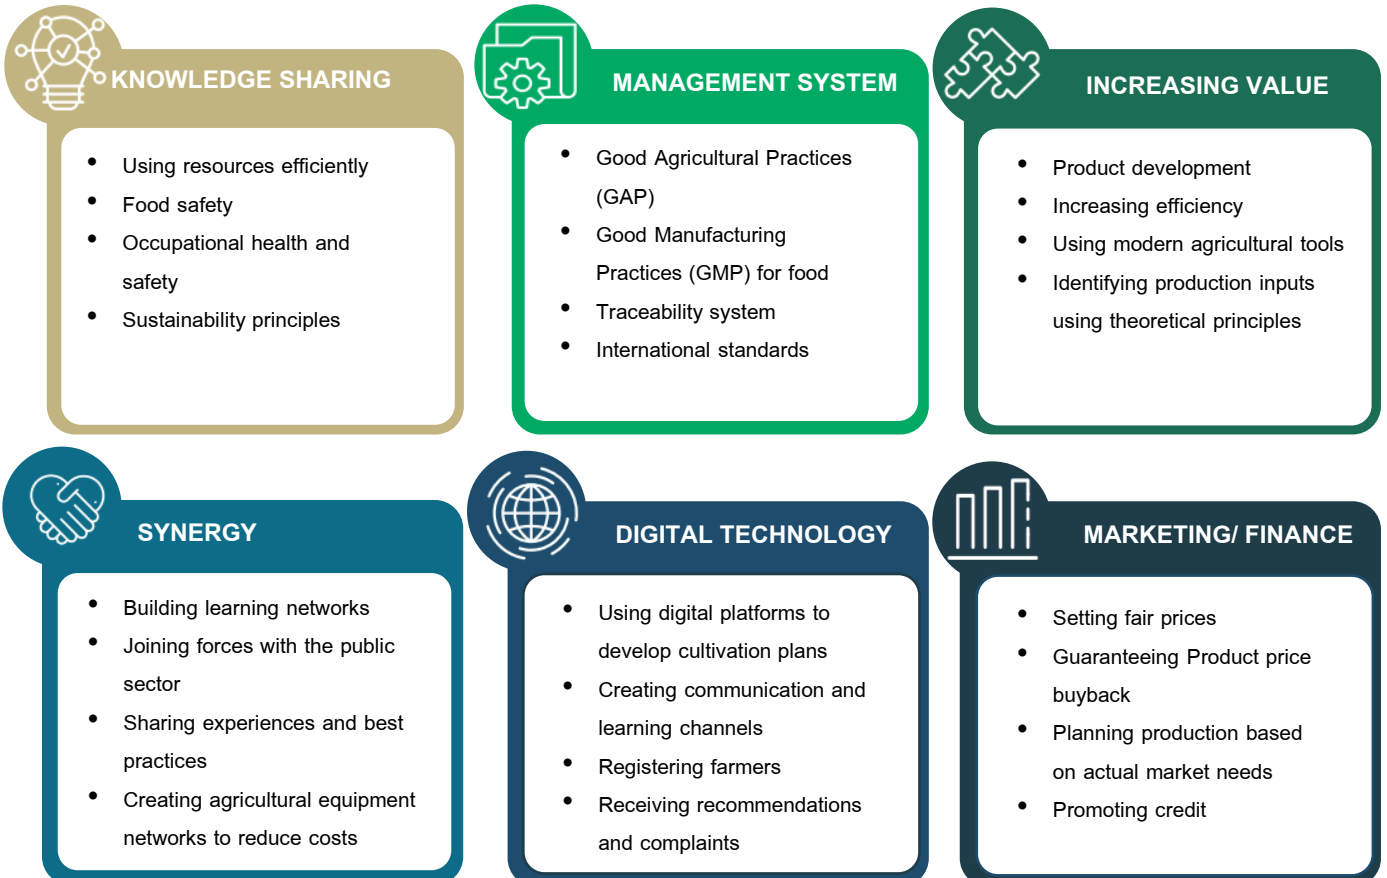

SUPPLIER ASSESSMENT PROCESS

ENHANCING SUPPLIERS' CAPABILITIES

Our business strives to enhance the capabilities of our suppliers in various key areas, including safe and sustainable production practices.

This is achieved through a management system that ensures proper planning and continuous improvements, creates learning networks, adopts digital technologies, and supports marketing to enhance the value and capabilities of suppliers to achieve sustainable business operations.

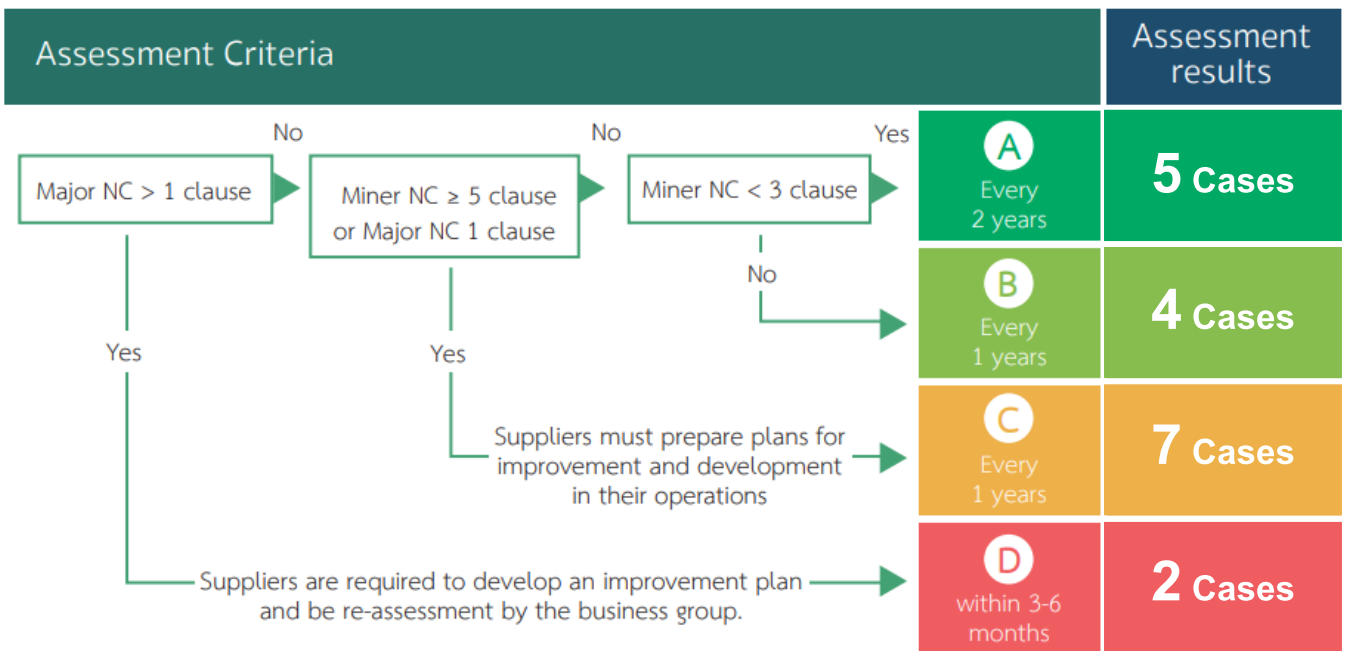

ASSESSMENT OF IMPORTANT SUPPLIERS

There is a committee to assess compliance with the rules. Commitment to business as a standard and operating guidelines Establish a registry of key business partners (Critical 1Tier Supplier), including set criteria for evaluating business partners and operating standards. After grading the assessment scores Both the self-assessment form and the assessment of the auditor team are as follows:

Remarks::

- The calculation method under this Sustainability report is in accordance with GRI Standards (GRI 302-1) - Total fuel consumption = the sum of all types of fuel resource consumption x its heating value (in each) - Unit in GJ per month (the conversion factors are based on Thailand Energy Efficiency Situation report 2018 by Department of Alternative Energy Development and Efficiency)
- Electricity consumption = The sum of electricity used (in kWh) x 3.6 - Unit in GJ per month) Total energy consumption = non-renewable energy consumption + renewable energy consumption + electricity consumption (Unit in GJ per month)
- Energy types included in the calculation of intensity per revenue are non-renewable energy including coal, fuel oil, diesel, gasoline, bunker oil, LPG, and natural gas as well as renewables including biogas, biomass (such as rice husk, charcoal, cashew nutshell, fire wood/ scrap wood/woodchips, corn cob, pal kernel shells, and sawdust) and biodiesel, and electricity consumed within the organization only (GRI 302-3)
- Reporting scope of GHG emissions covers CO₂, CH₄, and N₂O The Global Warming Potential (GWP) used in the calculation is referred to the given values of IPCC, while the greenhouse gas emission factors are based on the information from the Thailand Greenhouse Gas Management Organization (Public Organization) and Energy Policy and Planning Office, Ministry of Energy, which is available at the time of disclosure of this Sustainability Report. (GRI 305-1, GRI 305-2, and GRI 305-4)
- Reporting scope of GHG intensity includes only GHG scopes 1 and 2 (GRI305-4)
- Total water consumption is collected by using data from water meter, water bill, calculation from flow rate of water pump and average volume of rainwater from Meteorological Department (GRI 303-3 : 2018)
- Total reused/recycled water is calculated by using data from water meter and flow rate of water pump (GRI 303-3 : 2016)
- Total hazardous and non-hazardous waste stored within organization is an accumulated figure in previous year (GRI 306-3)
- Total waste generated is a figure of non-hazardous waste and hazardous waste generated in each year. For the amount of waste stored within the organization, the calculation is from an accumulated figure of waste in the present year - an accumulated figure of in the previous year (GRI 306-4)
- All information about waste disposal methods have already been approved by waste disposers or waste disposal manifest from waste disposers (GRI 306-5)

LRQA Independent Assurance Statement

Relating to C.P. Intertrade Company Limited's Sustainability Report for the calendar year 2022

This Assurance Statement has been prepared for C.P. Intertrade Company Limited in accordance with our contract but is intended for the readers of this Report.

Terms of engagement

LRQA (Thailand) Ltd. was commissioned by C.P. Intertrade Company Limited (CPTG) to provide independent assurance on its Sustainability Report 2022 "the report" against the assurance criteria below to a moderate level of assurance and at the materiality of the professional judgement of the verifier, using AccountAbility's AA1000AS v3¹, where the scope was a Type 2 engagement.

Our assurance engagement covered CPTG's subsidiaries in Thailand only includes the rice business, transportations, and services and specifically the following requirements:

- Evaluating CPTG's adherence to AA1000 AccountAbility Principles (2018) of Inclusivity, Materiality, Responsiveness, and Impact.
- Confirming that the report is in accordance with:
 - GRI Standards (2021)
- Evaluating the reliability of data and information for only the selected indicators listed below:²
 - *Environmental:*
GRI 302-1 Energy consumption within the organization, GRI 303-3 Water withdrawal, GRI 303-4 Water discharge, GRI 303-5 Water consumption, GRI 305-1 Direct (scope 1) GHG emissions, GRI 305-2 Energy indirect (scope 2) GHG emissions, GRI 306-3 Waste generated, GRI 306-4 Waste diverted from disposal and GRI 306-5 Waste directed to disposal.
 - *Social:*
GRI 403-9 to 10 Work-related injuries and ill health.

Our assurance engagement excluded the data and information of CPTG's subsidiaries within Thailand where it has no operational control, all operations, and activities outside of Thailand and suppliers and any third-parties mentioned in the report.

LRQA's responsibility is only to CPTG. LRQA disclaims any liability or responsibility to others as explained in the end footnote. CPTG's responsibility is for collecting, aggregating, analysing and presenting all the data and information within the report and for maintaining effective internal controls over the systems from which the report is derived. Ultimately, the report has been approved by, and remains the responsibility of CPTG.

LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that CPTG has not, in all material respects:

- Met the requirements above
- Disclosed reliable performance data and information as no errors or omissions were detected
- Covered all the issues that are important to the stakeholders and readers of this report.

The opinion expressed is formed on the basis of a moderate level of assurance and at the materiality of the professional judgement of the verifier.

Note: The extent of evidence-gathering for a moderate assurance engagement is less than for a reasonable assurance engagement. Moderate assurance engagements focus on aggregated data rather than physically checking source data at sites. Consequently, the level of assurance obtained in a moderate assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

LRQA's approach

LRQA's assurance engagements are carried out in accordance with our verification procedure. The following tasks though were undertaken as part of the evidence gathering process for this assurance engagement:

- Assessing CPTG's approach to stakeholder engagement to confirm that issues raised by stakeholders were captured correctly. We did this by interviewing CPTG's management who engage directly with stakeholder groups as well as reviewing documents and associated records.

² GHG quantification is subject to inherent uncertainty.

- Reviewing CPTG's process for identifying and determining material issues to confirm that the right issues were included in their report. We did this by benchmarking reports written by CPTG and its peers to ensure that sector specific issues were included for comparability. We also tested the filters used in determining material issues to evaluate whether CPTG makes informed business decisions that may create opportunities which contribute towards sustainable development.
- Auditing CPTG's data management systems to confirm that there were no significant errors, omissions or mis-statements in the report. We did this by reviewing the effectiveness of data handling process, and systems, including those for internal verification. We also spoke with key people in various departments responsible for compiling the data and drafting the report.
- Visited CPTG's operations as business representative (Nakhonluang Rice Mill and Logistics office in Bangkok) to sample performance data and information for the selected specific standard disclosures to confirm its reliability.

Observations

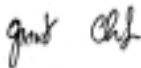

Further observations and findings, made during the assurance engagement, are:

- **Stakeholder inclusivity:** We are not aware of any key stakeholder groups that have been excluded from CPTG's stakeholder engagement process. CPTG has addressed the key stakeholder group's opinion regarding their impacts.
- **Materiality:** We are not aware of any material issues concerning CPTG's sustainability performance that have been excluded from the report. CPTG has processes for identifying and determining material issues based on a set of unbiased criteria and qualitative impact valuation.
- **Responsiveness:** CPTG has addressed the concerns of stakeholders in relation to transition plan for climate change. However, we believe that future reports should disclose safety practices and improvement in all CPTG operations.
- **Reliability:** Data management systems are well defined, but the implementation of these systems varies across CPTG's operational facilities.
- **Impact:** CPTG has addressed impacts valuation of an agriculture products, food loss and climate change related.

LRQA's standards, competence and independence

LRQA ensures the selection of appropriately qualified individuals based on their qualifications, training and experience. The outcome of all verification and certification assessments is then internally reviewed by senior management to ensure that the approach applied is rigorous and transparent.

This verification is the only works undertaken by LRQA for CPTG and as such does not compromise our independence or impartiality.

Opert Charuratana
Lead Verifier
