Health and Nutrition Policy

Crop Integration Business Rice Business Transportation and Service 's a comprehensive agricultural, transportation, and service business, is committed to providing high-quality, nutritious, safe, and traceable products. Our products undergo rigorous testing and development by experts using cutting-edge technology. Sourced from carefully selected, high-quality raw materials and produced through efficient processes that adhere to international standards, our products are coupled with responsible business practices and communication.

To offer nutritious products that cater to consumer needs and to promote accurate knowledge and access to quality, nutritious food, Crop Integration Business Rice Business Transportation and Service 's has established the following guidelines:

1. We prioritize the production and sale of fresh, hygienic, and high-quality food. Our operations strictly comply with all Thai laws, regulations, and standards, as well as those of our trading partners or exceeding them.
2. Our products contain the essential nutrients required by the human body and/or are natural products. We strictly adhere to the laws of Thailand and other countries where we operate or invest, as well as to customer specifications that do not violate the laws of those countries. We will specify the complete energy and nutrient requirements of the human body in appropriate quantities for consumption.
3. Product labeling: Clearly indicates key ingredients, usage instructions, and storage methods to help consumers understand nutritional value, avoid potential allergens, and properly maintain the nutritional value of the product.
4. Providing information on consumption and good health: Creating awareness among consumers through various company communication channels such as print media, online media, etc. Clear and beneficial nutritional information and product details will be displayed on product labels.
5. Access to good health: Promoting activities related to physical and mental health and well-being.

To ensure that this health and nutrition policy is effectively implemented, all companies are required to adapt it to suit their respective business operations.
